GENERAL SAFETY and CARE

Thank you for your purchase of the Core Health & Fitness personal viewing screen.

This product has been designed specifically for use in the health & fitness industry, ensuring maximum performance and longevity in the harsh fitness club environment. Properly cared for, this product will provide years of high-quality entertainment.

Prepare an area in which to place the product components as they are removed from the box prior to installation. The surface of the work area should be clean so as not to damage the screen and associated components.

Do not open package using sharp instruments or tool.

Inspect all shipping carton for signs of damage and to ensure that the contents of the carton have not broken loose during shipping.

Important Safety Instructions

Before you begin, read all warnings.

CAUTION! **RISK OF ELECTRICAL SHOCK**

Do not attempt to disassemble, open or otherwise service the product. There are no user-serviceable parts inside.

Do not expose unit to liquid, rain, excessive moisture or areas of high humidity.

Do not use bent, damaged or modified power cords. Discontinue use and contact your technician.

Do not spray cleaner directly onto monitor. Clean only with a dry, soft cloth.

- ⚠ Only use the power adapter ***supplied with this product!*** Use of non-approved power adapters may result in personal injury or damage to the product.
- ⚠ This product should be installed using a manufacturer-approved mounting method **ONLY**. Use of unapproved mounting brackets may damage the product and void the warranty.
- ⚠ Route all cables safely per mounting situation. Ensure that the cables are routed in a manner as to avoid being damaged by personnel or equipment.
- ⚠ Ensure the product has adequate ventilation so as not to overheat the product. Do not place anything on the product that may impede proper air circulation and thus damage the product.
- ⚠ Avoid extreme temperatures. Locate the equipment away from sources of heat, such as radiators and heat registers.

FCC Statement

Radio Frequency Interference (RFI) Federal Communications Commission, Part 15

This device complies with Part 15 of the [FCC](#) Rules (47CFR15). Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This product generates and utilizes radio frequency energy. If not installed and maintained in accordance with the installation & maintenance procedures as prescribed by MYE Entertainment, there is a possibility of causing interference with other services.

In order to determine whether or not this product is generating harmful interference, try performing the following steps:

- Try turning off the product by unplugging it from the AC power receptacle.
- Try powering the product from another AC power receptacle.
- Relocate or turn the antenna of the receiving device.
- Increase the distance between this product and the receiving device.

If these steps do not resolve the interference, please contact your local installing company.

4. Push VOLUME ▲ keys to select Yes.

Broadcasting frequency is automatically searched and saved. The search starts from analog TV (NTSC) to digital TV (VSB/QAM) and takes from 4 to 5 minutes. Channel numbers are allocated for weak signals from analog broadcasting. In DTV, weak signals or signals without broadcasting are ignored.

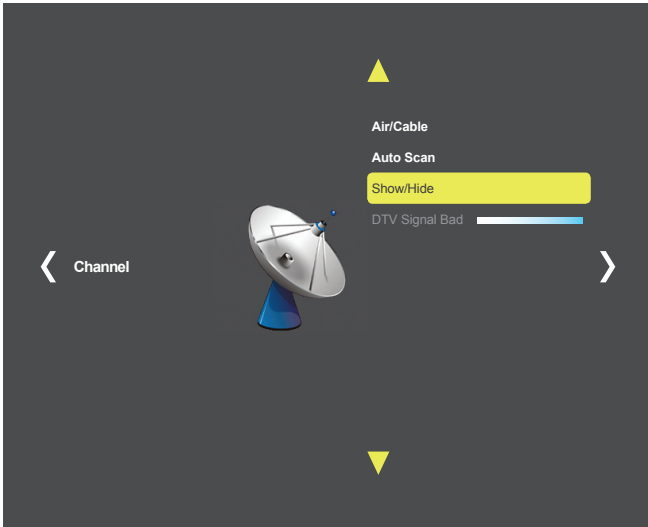

Depending on the content provided by the cable or satellite company, there may be some content received that is inappropriate for your intended viewing audience. Once channel scanning is complete, these channels can be deleted as necessary by using the keypad.

INPUT SIGNAL LEVEL REQUIREMENTS

Common sources of television signal are cable, satellite or over-the-air antenna systems. Many of these choices will provide signal in analog, digital or both even both formats. In order to provide high-quality images, the signal level supplied to each screen should be in the range of -70dBm to -5 dBm when read on analog channels. A signal level outside of this range will provide less than optimum results. In order to ensure the highest degree of satisfaction, MYE Entertainment recommends using a MYE Entertainment Certified Installer for installation & ongoing maintenance.
